DETAILED ACTION

1. The enclosed detailed action is in response to the Application submitted on December 28, 2001.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Chinchar et al. (USPN: 6,675,178).

Regarding claims 1, 10, 19, 25, 28-30 and 36-37, Chinchar discloses a data cache (comprised of the logic elements in Figure 1, which performs the scan and update operations) coupled to a first set of data (data stored in Figure 1, Reference 10) and a second set of data (data stored in Figure 1, Reference 30) and configured to perform a scan operation on at least of portion of the first set of data and an update operation on the second set of data with changes that have occurred in the first set of data (Figure 3, (all steps); Figure 5, Steps 10-38); an engine manager coupled to the data cache and configured to instruct the data cache to perform the scan and update operations (logic in the system which initiates the above steps in Figure 3 and Figure 5; C 8, L 46-53; C 9, L 5-8); and a solver (Figure 1, References 22, 24, 26 and 28) coupled to the data cache and configured to perform computations on the second set of data (Figure 4 (all steps); Figure 5, Step

40). Additionally, regarding claim 37, all hardware systems include software (instructions on a computer readable medium) to control the hardware elements of the system.

Regarding claims 2, 11 and 19, Chinchar discloses an application specific plug-in coupled to the solver to perform the computations on the second set of data (the system software used to control elements 22, 24, 26 and 28 in Figure 1).

Regarding claims 3, 12, 20 and 31, Chinchar discloses the system configured to update the second set of data with substantially no more than the changes to the first set of data (C 9, L 1-18; C 11, L 17-54).

Regarding claims 4, 13, 21, 32 and 34, Chinchar discloses the system configured to update the second set of data with changes to the first set of data in a near real-time fashion (C 11, L 55-63).

Regarding claims 5, 14, 22 and 33, Chinchar discloses the system is configured to update the second set of data with substantially no more than the changes to the first set of data that meet a given condition (C 9, L 1-18; C 11, L 17-54; condition -> data which has been changed since the last update).

Regarding claims 6, 15 and 23, Chinchar discloses the data cache coupled to a first set of data and a second set of data in a bidirectional fashion (C 4, L 54-55; C 10, L 64-67).

Art Unit: 2187

Regarding claims 7, 16 and 24, Chinchar discloses the first set of data comprising metadata (Figure 1, Reference 14, configuration data) and application data (Figure 1, Reference 12; transactional data).

Regarding claims 8, 17 and 26, Chinchar discloses the solver comprising a generic algorithms module (C 5, L 10-67; C 6, L 1-23).

Regarding claims 9, 18, 27 and 35, Chinchar discloses the computations solving problems encountered in business applications (C 3, L 11-25; C 4, L 66-67; C 5, L 1-3).
